# *i-codes*

This is the sixth in a series of publications exploring the differences between the Uniform and International Codes (I-Codes). Topics covered in the series include means of egress, building uses, heights and areas, types of construction, fire-resistance-rated assemblies, accessibility, structural provisions, and the residential and mechanical codes. Additional topics may be added in 2004.

## Accessibility

### New I-Codes in 2004

The 2003 editions of the International Building, Residential, Mechanical and Fire Codes (I-Codes) will replace the Uniform Codes this summer.\* DPD expects the I-Codes to take effect in Seattle in late summer 2004.

You may use the I-Codes before Seattle formally adopts them, but should call (206) 684-8850 for a pre-submittal conference before proceeding with design. You can choose to use either the I-Codes or the Uniform Codes during the 60-day period after the effective date.

The Seattle amendments to the I-Codes will be available by the effective date from DPD's Public Resource Center, 20th floor, Seattle Municipal Tower, (206) 684-8467.

**Questions?** Call DPD technical support line at (206) 684-4630, 1-4:15 p.m., M-F.

### Accessibility Changes in 2003 Building Code

One of the most interesting changes in the 2003 Seattle Building Code will be in the area of accessibility. The State has decided to adopt Chapter 11 of the International Building Code (IBC) instead of the unique State provisions that have been in effect in Washington since the 1970s.

IBC Chapter 11 contains scoping provisions for accessibility—it tells us when accessible features are required. The IBC adopts ANSI A117.1, "Accessible and Usable Buildings and Facilities," to tell us how to design and construct accessible features. In addition, some of the unique requirements from the current State Building Code will be carried forward as Washington amendments to the 2003 International Building Code. Since local jurisdictions do not have authority to amend Chapter 11, the State Code will be enforced here with no changes to the accessibility provisions.

The primary reason for this change was a desire for consistency with national standards. International Code Council has worked diligently with the Department of Justice and the Department of

Housing and Urban Development to make Chapter 11 and A117.1 consistent with the Americans with Disabilities Act and the Fair Housing Act.

Washington state will drop its current accessibility regulations in favor of the IBC's Chapter 11

### Finding the Codes Online

The State Building Code, including Chapter 11, is available on the State Building Code website at [www.sbccc.wa.gov](http://www.sbccc.wa.gov) (click on "State Building Codes" on the left side of the screen). For hard copies, see the information in left-hand box.
